

AIO EXCHANGE INTEGRATION OFFER

Introduction to AIO Exchange

AIO Exchange (AIO) stands as a revolutionary crypto exchange aggregator, designed to streamline trading by compiling over 5000+ tokens available across 19 (current) leading centralized and decentralized exchanges into a single, efficient platform. With AIO Exchange, users enjoy the convenience of accessing a vast market landscape, exceptional trading tools, and real-time data - all through one user-friendly interface or the All-In-One API.

Key Features

Unified Trading Platform: Access **19 exchanges** and other aggregators from one account or API.

Best Execution Trades: Real-time scanning of order books, trading and withdrawal fees to calculate optimal pricing.

Custom Selection: Users can choose from a single exchange or a group to find the best rates.

Fully licensed as an exchange and custodian service provider in Europe.

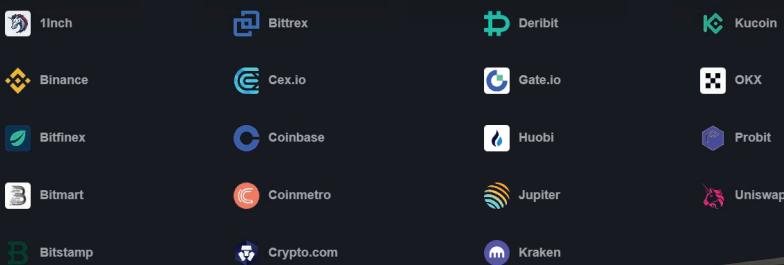

Extensive Asset Selection: Explore and trade amongst over **16,000** unique token pairs.

Instant Trading Option: For a nominal fee, trades execute instantly, bypassing typical wait times

User Base & Volume: Benefit from AIO Exchange's **5100+ users** and arbitrage bots.

The screenshot displays the AIO Exchange interface. On the left, a large chart shows price movements for SOL/USDT. To the right, a detailed view of the Order Book for SOL/USDT is shown, listing various exchanges and their current bid and ask prices. A modal window titled 'Order Details' provides specific information about a recent trade, including the symbol (BTC-USDT), type (MARKET), status (COMPLETE), and execution exchange (BINANCE). It also shows the amount received (0.0017 BTC), the side (BUY), and the time (2023-10-19T04:33:19). Below this, two tabs for 'Deposit Method' and 'Withdraw Method' are visible, each showing a list of exchanges and their respective transaction details. At the bottom, a table lists several completed trades, including BTC-USDT, BCH-USDT, SOL-USDT, AVAX-USDT, SOL-USDT, and SOL-USDT, with columns for Price, Type, Time, Status, and Tx ID.

EXCHANGES INTEGRATED

Value to Partner Exchanges

- **Increased Volume:** Tap into AIO's significant active user base and arbitrage bots (through the all-in-one consolidate API) for higher trade volumes.
- **Trading Fee Revenue:** Earn from trading fees generated by AIO's directed traffic.
- **Withdrawal Fees:** Every AIO trade involves a withdrawal, creating additional revenue streams.
- **Tokens In Spotlight Marketing (for exchange tokens):** One day a week for eight weeks of token in the spotlight marketing boosting the presence of the token to the AIO Exchange user base. Includes a custom description and information about the token upon user searching.
